Sustainability

We offer a suite of products with a lower environmental impact to provide flexible packaging solutions that help you meet your sustainability targets and goals.

- How2Recycle pre-qualified recyclable films
- Rollstock and pouches with recycled content
- Plant-based renewable PE resins
- Compostable film or paper-based structures

Decoration

Many decorative and surface treatment options are available to showcase your brand's unique look and feel.

- High-definition flexography
- Paper touch
- Rotogravure
- Soft touch matte
- Digital printing
- Registered matte

Closures

For consumer convenience and to maintain product freshness, flexible packages are available with several resealable and venting options.

- Spouts — smart, top, corner, face flange
- Zippers — linear tear, press-to-close, front panel, side pour, pull tab
- Degassing valves

Pouches, Bags, and Lidding

Customers can choose from a variety of preformed pouches, bags, and lidding.

- Flat
- Specialty shapes
- Stand-up
- Multiwall paper
